Summer Math Reinforcement Packet Students Entering into 5th Grade

Dear Parents,

Our fourth graders had a busy year learning new math skills. Mastery of all these skills is extremely important in order to develop a solid math foundation. The fifth grade math program will add onto these fourth grade skills, so any time spent learning or reinforcing these concepts will be very beneficial to your child. Each year builds upon the previous year's skills in math. Student mastery of the basic math skills is as important to success in future mathematical procedures and reasoning as learning the alphabet is to reading and writing.

While summer is a time to relax from the rigors of school, it is important to review and practice the math concepts from the previous year. Have your child complete one page (one side), three times a week of the math packet. Your child will receive a reward for completing the packet, but the biggest reward of all will be being ready for fifth grade! Please return this completed packet in August to your fifth grade teacher.

Here are some suggested websites for learning and reinforcement of math skills:

www.ixl.com/math; www.harcourtschool.com; www.aplusmath.com;

www.eduplace.com; www.khanacademy.com; www.mathgames.com_

Thank you for assisting us in educating your children. If you have any questions or concerns, please feel free to contact us..

Have a wonderful summer,

Rabbi Kalman Baumann - Principal

Dr. Gur Berman - General Studies Principal

Mrs. Jodi Tuchinsky - Math Department Head
