Summer Math Reinforcement Packet Students Entering into 4th Grade

Dear Parents,

Our third graders had a busy year learning new math skills. Mastery of all these skills is extremely important in order to develop a solid math foundation. The fourth grade math program will add onto these third grade skills, so any time spent learning or reinforcing these concepts will be very beneficial to your child. Each year builds upon the previous year's skills in math. Student mastery of the basic math skills is as important to success in future mathematical procedures and reasoning as learning the alphabet is to reading and writing.

While summer is a time to relax from the rigors of school, it is important to review and practice the math concepts from the previous year. Have your child complete one page (one side), three times a week of the math packet. Your child will receive a reward for completing the packet, but the biggest reward of all will be being ready for fourth grade! Please return this completed packet in August to your fourth grade teacher.

Here are some suggested websites for learning and reinforcement of math skills:

www.ixl.com/math; www.harcourtschool.com; www.aplusmath.com; www.eduplace.com; www.khanacademy.com; www.mathgames.com

Other games and activities you can play:

Computation Practice using a Deck of Cards: Take a deck of cards and remove the face cards (kings, queens, jacks). Aces are one. Divide the cards evenly among 2 players. Each player flips over a card. The first one to add the 2 numbers correctly the fastest wins the cards. After going through the pile of cards, the player with the most cards wins. You can do a multiplication version also.
